SUMMARY

Hello, I've been working as a QA engineer for a year now. Since I joined the team, we have added a lot of useful and complex functionality to the web application. We have started developing a mobile app. During this time, I've improved my knowledge in backend and frontend testing, mobile API testing, and mobile app testing. Now I'm exploring test automation to shorten the timeframe and improve the quality of testing.

SKILLS

- Testing theory (development methodologies; types and levels of testing; test design techniques; test documentation; bug reports)
- Experience in Agile software development methodology (Scrum, Kanban)
- Work in bug tracking system (JIRA)
- Mobile application testing (Android Studio, Xcode)
- Web application testing (DevTools)
- API testing (REST - Postman; GraphQL - Insomnia)
- Working with traffic analyzers (Charles, Fiddler)
- Performance testing (Locust, Jmeter)
- Working with databases (MySQL)
- Basic knowledge of SQL (Select, Join, Insert)
- Version Control Systems (Git)
- Basic knowledge of Python, C#

LANGUAGE

English - B1 (*intermediate*)
Russian - *native*

EDUCATION

2021-...

Self-education in Quality Assurance

- Automation testing Selenium+Python
- Articles, books, videos and simulators in the public domain
- "Software Testing" course of BelHard

2020

IT-Academy

- C# programming

2014 - 2020

Witte Moscow University

- Information technology, Business analytics and applied informatics

WORK EXPERIENCE

09.2021- ...

FindSport

QA Engineer

- Functional testing and verification of compliance with the documentation of new Web application functionality (smoke, regression, documentation analysis)
- Functional and non-functional testing of a mobile application for Android and iOS
- Writing and maintaining test documentation for web and mobile applications
- Analysis of the introduction of new and assessment of the need to change existing functionality to improve the quality of the web application
- Compiling bug reports and checking their correction
