PROFILE

I am conducting an analysis of the requirements and assessed the need to change the existing functionality to improve the web application, functional testing, smoke testing and regression testing to ensure the quality of the web application. I write bug reports and compiled test documentation to report defects and problems to the development team. I conduct functional and non-functional testing of Android and iOS mobile applications and API.

Configured the testing automation process using Java, Selenium, TestNG and Allure to increase the efficiency and coverage of testing. I am currently developing automated test scenarios to ensure the stability and reliability of a web application.

SKILLS

- Testing theory (development methodologies; types and levels of testing; test design techniques; test documentation; bug reports)
- Version Control Systems (Git)
- Automation testing with Java, Selenium, Rest Assured, TestNG, Allure
- Experience in Agile software development methodology (Scrum, Kanban)
- Work in bug tracking system (JIRA)
- Mobile application testing (Android Studio, Xcode)
- Web application testing (DevTools)
- API testing (REST - Postman; GraphQL - Insomnia)
- Working with traffic analyzers (Charles, Fiddler)
- Performance testing (Locust, Jmeter)
- Working with databases (MySQL, MondoDB)
- Basic knowledge of SQL (Select, Join, Insert)

EXPERIENCES

02.09.2021 - Present

FindSport
Full Stack QA Engineer

- Functional testing and verification of compliance with the documentation of new Web application functionality (smoke, regression, documentation analysis)
- Functional and non-functional testing of a mobile application for Android and iOS
- Writing and maintaining test documentation for web and mobile applications
- Analysis of the introduction of new and assessment of the need to change existing functionality to improve the quality of the web application
- Compiling bug reports and checking their correction

EDUCATION

RedRoverSchool by Sergei Demyanenko
2022 -2023 | Automation QA Engineer

Witte Moscow University
2014-2020 | Information technology, Business analytics, applied informatics
